

Feed back about Foundation Course 22-23

My name is G.DHIVAKARAN, a first year I'm a studying at Annapoorana medical college and Hospital, Salem, I'm writing this feedback letter not only with words, but as a visible gratitude to the institution and faculties for admitting me and conducting the "Foundation Course".

As any one says Foundation Course is a bridge course for people transferring from schools to med-schools. Foundation course was conducted both online and offline mode for period of 1 month .

It is not that easy to hope for tomorrow after failures in NEET more than twice, per normally I. It didn't happened on one day but when I got allotted I didn't salt that great, as "Man always think about flying squirrel" I am not an exception.

But after the first foundation class I started realizing that, we did something great as most of people were unable to do.

In very first class they named us an IMG like a new born and started teaching us like "Doctor Producing new Doctors".

The class on medical ethics was so good. The day I realized myself as a "Future Doctor". They think is, as a Doctor we can't like a life away from ethics.

The class took on History of medicine. I learned about the Greeks made the symbol of medicine called "Caduceus" which was worn by Doctor of centuries.

My mind filling class happened on topic, "The vaccination and immunization". Here the Doctor asked us to take vaccination for "Hapatities-B" for safety of medicos against prick injuries.

The ice breaking was conducted by all the faculties of all the department, first of all they allowed us to introduce, they taught us about basic life support. Like CPR, Attitude, Ethics, Communication by Dr. Niruba mam.

Dr. Dhanasekarar sir explained about “Medical curriculum entire MBBS course schedule, examinations, and new NMC regulation of IMG academic activities, and Assessments in our college ”.

Anesthesia Department did a live demonstration of CPR and it was very interesting to watch and we had hands on session using phone app and mannequins.

Thank you all the faculties & My AMCH

Premapuja. M

- Foundation Classes were interesting & understandable, doubts were also clarified by teacher's.
- Domains of learning made us to learn that we should master in all aspects from cognitive, affective and psychomotor skills.
- They taught about, IMG, Group dynamics, History of medicine, BLS, Time management, usage of smart phones in medicine field, Medical curriculum by NMC and basic values (or) qualities that a doctor must possess.
- In online demonstration in form of videos was done.
- Dr.N.Vijayakumari madam demonstrated with group activity about how group dynamics contribute to attain our goals.
- Using of computer in medical education was demonstrated.
- Importance of language and communication in medical field was emphasized.
- Class on stress management was an eye-opener to handle stress in daily life.
- We were allowed to see lots of specimens and labs during our offline foundation class.

Thank you Mam/Sir

S. Soundharya

Foundation course made us orient well to College, Hospital and faculties of our college.

IMG – Indian Medical Graduate is a first class. IMG main goal is Health for all people and make a healthy living. This goal inspired everyone of us. Life of doctor how they sacrifice their time with family, their enjoyment, sleep etc was insisted. Doctors are real heroes in our life. Doctors role as a professional, communicator, clinician, leader & member of a group, and life long learner also was understood.

Class on overview of MBBS course by DR.G.Dhansekar sir introduced us to website of our College ,5 years of medical student life in campus and academic activities in our curriculum .

Class on Biosafety and waste management by Department Of Microbiology faculties was a very useful. In visible dust to use soap only and invisible dust to use sanitizers for hand wash also was told

Segregation of the waste products based on color code demonstration was very useful. Donning and doffing techniques was taught. Precaution from needle stick injuries was insisted in the session.

My dream is to become a good doctor. Foundation course inspired me to work hard to achieve my dream.

Thank you for all staff's of our college.
