

Annapoorana Medical College & Hospitals, Salem
Ongoing Projects 2023

Department of Microbiology

1. Prevalence of Mupirocin resistance in MRSA among patients admitted at a tertiary care hospital, Dr.K.Sudha , MD Associate Professor,
2. Developing a prediction model for determining probability of harbouring ESBL producing Enterobacteriaceae in UTI, Dr.N.Shanmuga vadivoo, Professor & HOD
3. Medical students Knowledge, Perception and Attitude regarding Utility of Smartphone Medical Applications - A Self Directed Learning Tool, Dr.N.Shanmuga vadivoo, Professor & HOD
4. Prevalence of Mupirocin resistant Staphylococcus aureus in nasal carriage among health care workers at a tertiary care hospitals, Mrs.V.Sahana, Tutor
5. Comparison of aseptic blood collection method for blood culture using audio visual demonstration Vs Peyton's four step approach Skill lab training. Dr.B.Usha Professor & Dean,
6. Susceptibility Profile Of Multidrug Resistant Gram Negative Bacterial Infections To Carbapenams, Colistin And Ceftazidime Avibactam In A Tertiary Care Hospital In South India. Dr.G.Sasikala, Associate Professor,
7. Bacterial Profile, Molecular Characterization of ESBL Producing Pathogens and Diagnostic Stewardship in Skin and Soft Tissue Infections. Dr.Vijayarani PG
8. Bacteriological Profile, Risk Factors and Antimicrobial Resistance Pattern with Molecular Analysis of ESBL producing Uropathogens from a Tertiary Care Hospital in South India. Dr.T.Blessina Paulin PG
